Atmospheric and Environmental Sciences Doctoral Program Steering Committee

Charter

The Atmospheric and Environmental Sciences Doctoral Program Steering Committee joint doctoral program is operated as collaboration between the South Dakota School of Mines and Technology Departments Civil and Environmental Engineering, Chemistry and Applied Biological Sciences, Physics, and Math Computer Sciences. Participants from other SD Mines academic programs that entail environmental science-based research can participate and have students through in the program with steering committee approval. The Program’s steering committee consists of one faculty member from all four contributing departments and functions to set policy within the Atmospheric and Environmental Sciences Doctoral Program.

Membership
- Bill Capehart (Steering Committee Chair, Civil and Environmental Engineering)
- Lisa Kunza (Chemistry and Applied Biological Sciences)
- Adam French (Physics)
- Donna Kliche (Math and Computer Sciences)
- Darren Clabo (Civil and Environmental Engineering)
