Interdisciplinary Sciences Assessment Plan
by Objectives and Specific Outcomes

Effective December 2009

IS Objective #1: Students will develop a well-defined sense of their professional identities and goals.

Specific Outcomes:
1. Students will select and implement a curricular program of study that reflects and integrates their intended professional focus.
2. Students will receive consistent, knowledgeable advising.

IS Objective #2: Students will possess and apply the broadly-based education and basic skills required to achieve their goals.

Specific Outcome: Students will design, conduct, and present senior research projects that reflect the students’ professional career goals and integrate the coursework leading to the degree.

IS Objective #3: Students will be prepared to contribute as professionals and citizens in their communities.

Specific Outcome: IS graduates will demonstrate interest in and ability to contribute to their communities.
