ABOUT RAPID CITY
South Dakota’s second-largest city (pop. over 70,000) offers a quality of life you will love, with restaurants, entertainment outlets and shopping in Historic Downtown. Just 20 minutes from Mount Rushmore and the Black Hills, Rapid City is a perfect location for students interested in enjoying the outdoors.

ABOUT THE BLACK HILLS
The name “Black Hills” is a translation of the Lakota Pahá Sápa or “hills that are black.” One of the most historic and beautiful places in the country, the million-plus acre Black Hills National Forest and surrounding area feature Mount Rushmore, Crazy Horse Memorial, caves, canyons, wildlife, and other natural attractions. You can enjoy snowboarding, hiking, rock climbing, kayaking, mountain biking, fishing and more.

EXPECTATIONS OF INCOMING STUDENTS
Applicants must meet the minimum South Dakota Mines graduate education requirements. In addition, they will be evaluated against the following criteria:

- A baccalaureate degree in mechanical engineering or a closely-related field;
- An undergraduate grade point average of 3.0 or greater;
- Scores on the GRE;
- And, for those applicants whose native language is not English, their TOEFL score.

GRADUATION REQUIREMENTS
Students entering the program must submit a program of study and choose a major professor by mid-term of the second semester. Students will also be required to form a graduate committee to evaluate individual student progress through the qualifying and comprehensive exams, and the dissertation defense process. Graduation with an ME PhD requires 72 credit hours beyond the BS degree. Those entering with an appropriate master’s degree may obtain credit for work done toward that degree. For more information, visit sdsmt.edu/GraduateEducation.

GRADUATE RESEARCH ASSISTANTSHIPS
Funding opportunities, in the form of both teaching and research assistantships, are available for exceptional students.

ME PHD PROGRAM

The mechanical engineering (ME) PhD program at South Dakota School of Mines and Technology allows students to reach the highest level of academic achievement. In addition to teaching skills, graduates can pursue careers at research centers in national laboratories and research & development (R&D) centers in automotive, aerospace, oil, and gas. Students will have a chance to work with faculty involved in research at the forefront of their fields and to publish in acclaimed journals. They will conduct experimental/numerical/theoretical research in one of three areas: thermo-fluid sciences, solid mechanics & materials science, and robotics & controls. The program emphasizes flexibility, breadth, and depth: flexibility for the student and his/her doctoral committee to make choices; breadth across disciplines within and outside of mechanical engineering; and depth in one or more sub-disciplines. Graduates of the program will have demonstrated:

a) an ability to contribute new ideas, knowledge, applications, developments, and/or insights in an area of mechanical engineering;

b) a sufficient breadth of knowledge in their chosen areas within and outside of mechanical engineering;

c) an ability to formulate, and bring to meaningful completion, a research project.

NUMEROUS OPPORTUNITIES

The ME Graduate Studies and Research Program focuses on three primary areas of scientific research in mechanical engineering and engineering mechanics: fluid dynamics & thermal science, solid mechanics & material science, and robotics & controls. The research activities of the ME faculty involve both computational and experimental efforts across several departments, including the Advanced Intelligent Mechatronics Systems (AIMS) lab; Center of Excellence for Advanced Manufacturing and Production (CAMP); Experimental and Computational Mechanics Laboratory (ECML); Fluids, Thermodynamics, and Heat Transfer (FTH) lab; and Center for Security Printing and Anti-Counterfeiting (SPACT). Strong research collaborations exist among these laboratories, such as:

- Surface Engineering Research Center (SERC)
- Composites and Polymer Engineering (CAPE) lab
- Center for Security Printing and Anti-Counterfeiting (SPACT)
- Advanced Intelligent Mechatronics Systems (AIMS) lab
- Center of Excellence for Advanced Manufacturing and Production (CAMP)
- Experimental and Computational Mechanics Laboratory (ECML)
- Fluids, Thermodynamics, and Heat Transfer (FTH) lab
- Center for Security Printing and Anti-Counterfeiting (SPACT)

PHD STUDENT TESTIMONIALS

Why choose the Department of Mechanical Engineering's PhD program at South Dakota Mines?

I originally chose to attend SD Mines based on both its academic reputation as well as its well-known professors in my field.

Fariid Roustae, PhD student

Mechanical engineering at SD Mines has a wonderful, academic atmosphere, which supports diverse teams in finding creative new approaches to existing problems in the world. From coursework, to classesmates, to the resources, to the facilities, to the research opportunities, to the professors, it is unparalleled. The best part is the abundant research opportunities available through the SD Mines Department of Mechanical Engineering. Highly accomplished professors and a wide variety of advanced and interesting classes, distinct school culture, and tight-knit communities prepare you well for any future career.

Subhaaesh Malik, PhD student

The research opportunities here (under Dr. Albert Romkes) made me choose the PhD program in the ME department.

Eirik Valseth, PhD candidate

What career paths have opened up for you due to your PhD studies?

My PhD studies here have led me to seek a career in academia. At the same time, I'm sure a career in industry would have been an option that could have easily been pursued with my new knowledge and skills.

Farid Roustae, PhD student

"I feel my PhD program can open up new lines of inquiry for this field and want to use it as the foundation for a research career. With a PhD degree and an academic career, I will be able to conduct my own research, which is my career goal."

Fariid Roustae, PhD student

What career paths have opened up for you due to your PhD studies?

My PhD studies here have led me to seek a career in academia. At the same time, I'm sure career in industry would have been an option that could have easily been pursued with my new knowledge and skills.

Fariid Roustae, PhD student

FACULTY

The faculty members in the Department of Mechanical Engineering at South Dakota Mines are dedicated to providing the highest quality academic guidance. Below are current ME faculty members associated with the PhD program.

Dr. Pierre Larochelle experimental solid mechanics and robotics Department Head

Dr. Duane Ahola thermosciences, energy storage, combustion

Dr. Jason Ash experimental solid mechanics

Dr. Cassandra Blivenkott solid mechanics of polymers

Dr. Nicklaus Bruno mechanical thermodynamics of shape memory alloys

Dr. Prasoon Diwakar plasma physics and aerosol measurements

Dr. Hadi Fekrmandi mechanisms and robotics

Dr. Joseph John Thakakkott features at limits of continuum field theory

Dr. Aaron Lalley advanced manufacturing and VMC machining

Dr. Prasoon Diwakar plasma physics and aerosol measurements

Dr. Peter McKeon structural health monitoring

Dr. Joseph John Thakakkott features at limits of continuum field theory

Dr. Duane Ahola thermosciences, energy storage, combustion

Dr. Jason Ash experimental solid mechanics

Dr. Cassandra Blivenkott solid mechanics of polymers

Dr. Joseph John Thakakkott features at limits of continuum field theory
